

## FOR IMMEDIATE RELEASE

### Technologent Sponsors HIMSS Southern Chapters Regional Conference

LAKE FOREST, CA, April 12, 2010 - Technologent, a leading national provider of technology infrastructure solution for Fortune 1000 companies and a certified Women-Owned Business Enterprise (WBE), will participate as a sponsor in the upcoming HIMSS Southern Chapters Regional Conference on May 13-14 at the Crowne Plaza Hotel in Addison, TX.

“Healthcare is an important initiative for Technologent.” said Rod Wright, Technologent VP of Sales, Central/Eastern Regions. “Our goal is to understand the complexities of the healthcare market and to provide solutions to our customers that improve patient care, reduce errors, and secure patient privacy.

The theme of this years’ conference is “Change is all around us”. The landscape of healthcare is changing. How do we keep up and make sense of the HIT alphabet soup (ARRA, HITECH, HIE, NHIN, CPT10, HIPAA 5010, etc.) and plan a roadmap to get us to "meaningful use"?

- How do we drive clinician adoption and improve clinical outcomes through information technology?
- Where is the logical place for the HIE, and how do you build a sustainable model?
- How has HITECH impacted privacy and security requirements?
- How will we meet the requirements for quality reporting and pay for performance changes?
- What will the impact of incentive payments be on physicians and hospitals?

Technology offers a compelling cure for many of the tough challenges facing today's healthcare organizations, including expanding industry regulations, heightened patient safety concerns, staffing shortages and a constant need to contain costs. Broad use of Healthcare Information Technology has the potential to improve healthcare quality, prevent medical errors, increase the efficiency of care provision and reduce unnecessary healthcare costs, increase administrative efficiencies, decrease paperwork, expand access to affordable care and improve population health. The benefits of appropriate sharing of health information among patients, physicians and other authorized participants in the healthcare delivery value chain are nearly universally understood and desired.

### ABOUT HIMSS

The [Healthcare Information and Management Systems Society](#) (HIMSS) is the healthcare industry's membership organization exclusively focused on providing global leadership for the optimal use of healthcare information technology (IT) and management systems for the betterment of healthcare. Founded in 1961 with offices in Chicago, Washington D.C., Brussels, Singapore, and other locations across the United States, HIMSS represents more than 23,000 individual members and over 380 corporate members that collectively represent organizations employing millions of people. HIMSS frames and leads healthcare public policy and industry practices through its advocacy, educational and professional development initiatives designed to promote information and management systems’ contributions to ensuring quality patient care.
