

FOR IMMEDIATE RELEASE

Technologent Sponsors HIMSS Southern California Chapter Clinical Informatics Summit

LAKE FOREST, CA, June 3, 2010 - Technologent, a leading national provider of technology infrastructure solution for Fortune 1000 companies and a certified Women-Owned Business Enterprise (WBE), will participate as a sponsor in the upcoming Clinical Informatics Summit on 25th June at UCLA Covel Commons Conference Center.

“Healthcare is an important initiative for Technologent.” said Marco Mohajer, Technologent Senior Vice President Sales and Marketing. “Our goal is to understand the complexities of the healthcare market and to provide solutions to our customers that improve patient care, reduce errors and secure patient privacy.”

The learning objectives for the 2010 Southern California Chapter of HIMSS Clinical Informatics Summit are to bring together providers, clinicians, allied health professionals and informaticists to work together to integrate science and technology, encouraging multi-disciplinary collaboration to bridge the gap across health systems improving patient safety, quality of care, workflow and clinical processes. Attendees will hear three keynote presentations and two panel discussions from locally and nationally recognized healthcare leaders in the fields of patient safety, quality of care, workflow/clinical processes, cross-collaboration, and innovative technology. The presenters hold varying scopes of responsibility within their represented organizations, which include some of the nation’s most prestigious hospitals, healthcare service providers, healthcare organizations, and universities.

Technologent offers several technology solutions focused on the healthcare industry. One solution significantly improves caregiver workflow. The solution replaces the current PC architecture with a dynamic virtual desktop architecture that delivers full desktop functionality over stateless thin client terminals. With this solution, doctors and nurses gain access to applications and patient information in seconds from anywhere in the hospital. Federal regulations and incentives are driving adoption of the “meaningful use” of electronic health records (EHR) within hospitals over the next few years. Technologent can help smooth that transition for caregivers. Technology solutions offered by Technologent enable an environment for doctors and nurses to access EHR through HIT applications almost instantly.

ABOUT HIMSS

The [Healthcare Information and Management Systems Society](#) (HIMSS) is the healthcare industry's membership organization exclusively focused on providing global leadership for the optimal use of healthcare information technology (IT) and management systems for the betterment of healthcare. Founded in 1961 with offices in Chicago, Washington D.C., Brussels, Singapore, and other locations across the United States, HIMSS represents more than 23,000 individual members and over 380 corporate members that collectively represent organizations employing millions of people. HIMSS frames and leads healthcare public policy and industry practices through its advocacy, educational and professional development initiatives designed to promote information and management systems' contributions to ensuring quality patient care.
