

BUSINESS SOLUTIONS

Technologent has been a leading national provider of technology infrastructure solutions for Fortune 1000 companies, aiding in bridging the gap between technology infrastructure and business strategy since 2002. We serve the complete technology lifecycle including assessment, design, integration and support services. We offer our customers unparalleled expertise, exceptional service and technology from best-of-breed partners.

Our focused solutions are designed to solve specific IT challenges and our skilled and experienced engineers:

- Identify the solution that meets the business and technology need,
- Design a solution that meets a defined budget,
- Deliver the complete solution and integrate it into an existing environment and systems, and
- Support the solution on an ongoing basis with managed services and service contracts.

At Technologent, the customer's specific business requirements and desired results are placed at the center of each solution. Our primary goal is to simplify technology and focus on a solution, not just a product. With our proven methodology, best-of-breed tools and extensive product certifications, we help our customers and their IT organizations architect, integrate and maintain a secure high-performance business infrastructure. The goal of every Technologent employee is to provide solutions that solve our customer's biggest, most important technology issues.

We believe all components of a system must be analyzed when building a solution. Our comprehensive approach and proven methodology in designing a technology solution ensures that we will deliver a solution that optimizes a customer's enterprise infrastructure and maximizes business value. In utilizing our proven methodology for all projects we undertake, our customers receive robust, scalable solutions that meet both short and long-term goals and infrastructure optimization.

Using proven hardware and software technologies, along with end-to-end services expertise, Technologent works closely with our customers to deliver solutions that maximize value. Our focused solutions are designed to solve specific IT challenges and our skilled engineers work with the customer to deliver the solution that meets the need, budget and timeframe. Our engineers are experienced in a variety of practices, including:

- Experience and expertise in all areas of the data center
- Architecture, integration and maintenance of a secure, high-performance business infrastructure
- Low, middle and enterprise storage specialists
- High-availability systems experts
- OnePoint maintenance contract and asset management portal
- Multiple operating systems and multi-vendor support services

Technologent has strategic partnerships in place to ensure that you receive the best pricing and support available.
