

## **Technologent Joins FairWarning® - Ready Solution Partner Program**

LAKE FOREST, CA, February 5, 2010 - Technologent, a nationwide Solutions Integrator, today announced that it has joined the FairWarning® - Ready Solution Partner Program. Technologent will deploy, service and resell FairWarning® privacy monitoring solutions.

The healthcare industry is experiencing an epidemic of high profile privacy incidents involving employees and affiliates using Electronic Health Records (EHRs) to conduct unlawful activities such as VIP record snooping, identity theft, medical identity theft as well as co-worker, family member and neighbor snooping. FairWarning®'s patient privacy auditing and monitoring is essential to complying with recent privacy regulations such as ARRA HITECH / Accounting of Disclosures, FTC Red Flags Rule, HIPAA, California SB 541 & AB 211 and other State Laws.

"Given the U.S. government's commitment to the use and safeguarding of electronic health records, there is a tremendous need for privacy solutions that protect patients from identity theft and medical record intrusion," said Marco Mohajer, Sr. Vice President Sales and Marketing. "As a Sun Microsystems Executive Partner, our relationship with FairWarning® will allow us to offer our customers' best-in-class privacy monitoring solutions that will help them pave the way to safely adopt electronic health records."

"FairWarning® has the most robust and comprehensive healthcare privacy surveillance solution on the market today, and we are thrilled to be able to offer a solution that has such significant impact on patient privacy," said Tom Gallaway, President. "This program gives us an easy way to introduce Sun's scalable and reliable systems combined with Forewarning's privacy surveillance application. At the same time, FairWarning® is a key component in growing our Healthcare practice."
